Graduate Student Field Day

Edisto Research and Education Center

Faculty from Clemson Experiment Stations have put together a graduate student field day to showcase research our graduate students are conducting. Students from Departments of Plant and Environmental Sciences and Agricultural Sciences will be presenting. This field day provides a great opportunity for faculty, researchers, and industry to learn more about specific research topics and to interact with our

graduate students. Topics will include: Planter Technologies and Peanut Harvester Research, Management Zone Development, UAV's, Peanut Disease Management, Cotton and Soybean Entomology Research and more!

Lunch will be served at 12:00pm. Dr. Carlyle Brewster, PES Dept. Head, will be our keynote speaker during lunch.
